

FLEXIO 590

The FLEXiO 590 is the perfect all-rounder for indoor and outdoor projects around the house & garden.

Powerful X-BOOST™ turbine provides enough power to spray any conventional paints, undiluted! With adjustable air pressure, the power of the turbine can be varied to suit any coating perfectly, for precise control.

The volume of paint can also be adjusted to suit the material being sprayed and the project type.

The i-Spray nozzle (WallPerfect spray attachment) allows interior acrylic paints to be atomised undiluted to achieve even paint coverage and a perfect finish. You can also spray thick exterior acrylics onto coarser surfaces. Instead of applying two coats of paint with a brush or roller, spray the same amount of paint in much less than half the time.

The Click & Paint™ gun design allows for the spray attachments to be changed quickly and simply which makes changing colours and clean up a breeze!

Comes complete with two spray attachments: WallPerfect for interior wall and ceiling paints & primers and exterior acrylics; Standard spray attachment for spraying lacquer, varnish, stain and other thinner materials. Plus a practical carry case.

The Click & Paint™ gun design allows for the spray attachments to be changed quickly and simply which makes changing colours and clean up a breeze!

This product carries a 3+1 year DIY warranty.

Specifications

Part No.	2361541
Power	660 W
Capacity	1300 ml / 800ml

Atomisation Power	200 W
Max Viscosity	4000 mPas
Paint Flow	0-500ml / min
