WAGNER

VISCO NOZZLE

Unique nozzle technology produces a high quality spray pattern, even with high viscosity materials. The slotted nozzle with adjustable spray fan also ensures fast operating speed.

DIRECT SPRAY CONTROL

Finely adjustable air flow (1) and material flow regulation (2) enable precise application. The spray level and fan width settings (3) allow additional adjustment to suit the object being sprayed.

Start the turbine conveniently at the gun itself by pressing the trigger into the first stage. The paint won't flow until the trigger is depressed fully to the second stage (4).

1

X - BOOST TURBINE

Powerful yet lightweight turbine provides very fast working speed.

CLICK & PAINT SYSTEM

The spray attachment can be cleaned quickly and easily. Additional spray attachments are available which allow for a wide range of materials and objects to be sprayed on the job.

Fully equipped

The FC3500 comes in a handy carry case. Fitted with a comfortable carry strap for easy handling, the shoulder strap can be attached to either the unit or the case. Also comes with a cleaning brush, 30 mesh filter for high viscosity materials, 50 mesh filter for low viscosity materials, 3 replacement air filters and 3 filling funnels.

Range of spray attachments to suit all projects

Your FinishControl can be used for a broad scope of applications, and can spray oil based paints and stains as well as high viscosity acrylic paints. The unique Click & Paint system enables the attachments to be changed quickly and easily.
