FinishControl FC5000

MULTI-PURPOSE SPRAY SYSTEM

- Suitable for solvent and water based materials.
- Ideal for small to medium sized projects.

www.wagneraustralia.com.au

The FC5000 is a compact all-rounder suited to a range of applications.

The Direct Spray Control feature allows for precise adjustment directly on the gun. Two spray attachments provide versatility for a range of projects & materials.

X - BOOST TURBINE

Powerful turbine provides very fast working speed.

DIRECT SPRAY CONTROL

Finely adjustable air flow (1) and material flow regulation (2) enable precise application. The spray level and fan width settings (3) allow additional adjustment to suit the object being sprayed.

Start the turbine conveniently at the gun itself by pressing the trigger into the first stage. The paint won't flow until the trigger is depressed fully to the second stage (4).

CLICK & PAINT SYSTEM

The spray attachment can be cleaned quickly and easily. Additional spray attachments are available which allow for a wide range of materials and objects to be sprayed on the job.

VISCO NOZZLE

Unique nozzle technology produces a high quality spray pattern, even with high viscosity materials. The slotted nozzle with adjustable spray fan also ensures fast operating speed.

FC5000 includes:

- FinishControl FC5000 turbine
- StandardSpray attachment
- FineSpray attachment
- 5 m air hose with metal handle

TECHNICAL DATA

Power Consumption:	1400 W
Atomisation Power:	300 W
Voltage:	230 V / 50 Hz
Weight:	8kg
Container Size:	1 litre
Part Number:	2338846
