## THE BENEFITS OF DIAPHRAGM PUMP TECHNOLOGY

- Patented QLS (quality long stroke) technology provides superior performance, eliminating pulsation for smooth application.
- The longer stroke of the piston allows for the application of a wide range of materials from thin liquids to high viscosity coatings.
- The reduced stroke rate means wear components are under much less stress, for longer service life and much lower maintenance costs.
- Valves are made of wear-resistant carbide and the diaphragm is made of solvent resistant polyamide.
- Ideal for use with hoppers and small colour runs because of the variable pressure control.

### WHAT PAINTERS ARE SAYING:

"The SF23 Pro packs a lot of benefits into an economical & compact unit. I use it for repaints and new projects for both acrylic and enamel paints. Top addition to my tool kit!"

Josh Ford  
Repaint Specialist, VIC

"The SF23 Pro is much quieter and achieves a far better finish, as well as savings in paint due to being able to run it at lower pressure (900psi)".

Phil Hathaway  
Daryl Hathaway Painting, QLD

# DIAPHRAGM DEPENDABILITY

## HIGH PERFORMANCE

- Modern & powerful design with a flow rate of up to 4.2 l/min.
- Faster working speed allows more capacity for additional projects.
- Can be used with 2 guns.
- Equipped with HEA for longer life, lower paint usage, better quality finish and less overspray.

## WAGNER LONG-STROKING TECHNOLOGY

- Very low downtime due to the robustness of the pump and capability for maintenance on the job site.
- The pressure can be precisely controlled even at very low pressures from 0 - 1000 psi, making spraying very low viscosity materials like varnish and gloss possible.

## EASY CONTROLS

- Pressure control and pressure gauge both conveniently placed on the front of the unit to make pressure adjustments very easy.

## NEW ERGONOMIC CART DESIGN

- Provides comfort and ease of handling despite the size and weight of the pump.
- Integrated hose rack and toolbox keeps everything neat and tidy and tools at hand.
- Shock absorbing pneumatic tyres for easy transport on even the most difficult job sites.

## POWRCOAT RANGE

Starting from \$5,995 RRP

### HIGH PRESSURE AIRLESS PNEUMATIC - PISTON PUMPS

Innovative and proven technology. The exciting PowrCoat range has been designed with a hardened chrome fluid section. The three-step hardening process makes this one of the hardest, most durable fluid sections in the market today.

The lubricated motors last longer, are more efficient and even quieter. AirCare not only lubricates but also minimises icing. Maintenance is simple and inexpensive. All pumps in this range are sold as bare units on a trolley with the inclusion of a wall mount frame, flexible suction hose, high pressure filter (50 mesh), prime spray valve, air regulator with water trap and auto drain, automatic air motor lubricator, earthing wire and clamp.
