SPRAYMANAGER

Built for professionals who demand power, precision & efficiency.

With advanced technology and an ergonomic design, this sprayer delivers superior results while making your job easier.

SMARTER

Take control from your smartphone or tablet. Monitor pressure, usage stats and maintenance alerts in real time with Bluetooth® connectivity and the dedicated app – giving you smarter oversight on every job.

5X QUIETER

Work more comfortably with significantly reduced noise output. The PS 4.23 is up to five times quieter than previous models, ideal for indoor environments or noise-sensitive sites.

22% LIGHTER

Engineered with a compact frame and reduced weight, the ProSpray PS 4.23 is 22% lighter – making it easier to lift, carry and move around tight or elevated workspaces without compromising durability.

HIGH EFFICIENCY

The brushless HE motor delivers high performance with less wear, meaning fewer service intervals, lower maintenance costs and a longer machine lifespan – built to last through demanding workloads.

VERTICAL FILTER

Maintenance is streamlined with a vertical filter setup that provides easier access and faster cleaning. Minimise clogs and downtime with a smarter filtration design that saves time on every job.

QUICK RELEASE

Designed for professional use, the PS 4.23 features a quick-release fluid section. Painters can remove and troubleshoot it on-site in minutes – reducing downtime and keeping projects on schedule.

RAPID CLEAN

Clean-up just got easier. The Rapid Clean system uses up to three times less clean up material than traditional methods, cutting clean-up time significantly and conserving resources on every job.

TIP AWARE TECH

Stay informed and protected. TipAware detects the tip size in use and provides alerts if incompatible or worn tips are fitted – ensuring accurate spray patterns, better results and safer operation.

BUILT TOUGH

Constructed with high-quality materials and engineered for durability, the PS 4.23 is designed to withstand the rigours of everyday job site conditions. Whether you're tackling interiors, exteriors or large-scale projects – it delivers consistent, reliable performance every time.

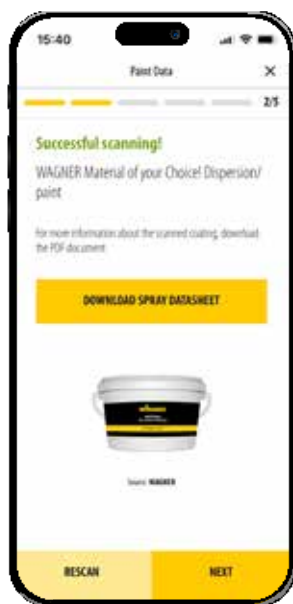

SprayManager App

IntelliSync Technology

The ProSpray PS 4.23 can be easily connected to the SprayManager app via Bluetooth®. This gives you access to additional functions. Whether you're standing right next to the machine or working on scaffolding, you can view and control current device settings with just a few clicks. To make your daily work easier, you can also set service intervals and check the current wear status of the airless tip in use at any time. Stay informed about the status of your sprayer(s) due to the automatic recording of processing parameters. Pretty smart, right?

Scan the Can*

Automatic material recognition provides you with all the processing information in seconds. Simply take a photo of the container – the app automatically provides you with all relevant processing information such as tip size, spray pressure and dilution. With one click, you'll be taken directly to the product data sheet.

*Scan the Can covers most leading brands.

MyFleet

MyFleet helps you maintain control over your airless sprayers by tracking their location, operating times and condition. You can easily add devices, including those from other manufacturers.

The Device Management feature allows for automatic recording of runtimes and service reminders, especially for connected WAGNER devices with IntelliSync. It provides straightforward maintenance instructions through text and video, along with a documented maintenance history.

TipAware

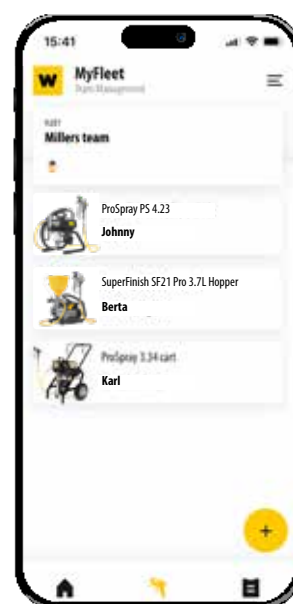

Worn tips consume too much material and produce a poor spray pattern. Unfortunately, tip wear isn't visible from the outside. With TipAware, you can check the condition of your airless tips in real time.

Insert a tip into the gun and spray water into a bucket for 30 seconds. Tip wear will be displayed in five stages. TipAware is also included in ProStart and shows you the tip quality in real time while you work.

MyWork

MyWork streamlines reporting by allowing easy access to jobs, orders, and work results with just a few clicks. ProStart users benefit from automatic workflow summaries, and manual additions eliminate handwritten reports for hassle-free handovers. A search function enables quick retrieval of specific orders or project details and your data remains securely accessible post-completion. You can also export orders as PDFs or Excel files for easy invoicing and documentation, enhancing your team's efficiency and reliability.

ProStart

Let ProStart guide you through your workflow - from preparation to documentation. ProStart combines our best features into one tool. Start by selecting an airless sprayer from your fleet. (It also works with non-connected sprayers and those from other manufacturers.)

Step 1 - Select your sprayer

Step 2 - Scan the Can: Automatic material recognition.

Step 3 - Choose a tip based on the recommendation.

Step 4 - Enter additional parameters for your job. What substrate and area do you want to coat?

Step 5 - Before starting, ensure that you have selected the right tools and settings; the app will alert you if your spraying equipment is unsuitable for the material. Once you begin recording, your work will be automatically saved and summarised in the "My Work" section. If you're using a WAGNER airless unit with "IntelliSync," both the app and the unit will manage the paint and pump settings for you. Additionally, you can control the pump from your smartphone during the job, regardless of its location.

**SMARTER. QUIETER. LIGHTER.
MORE PRODUCTIVE.**

Vertical filter

Housing enables cleaning and draining of filter 3X faster compared to previous ProSpray models

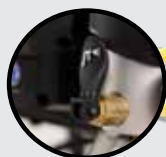

Rapid Clean

Function that reduces clean up time through flushing

Pressure Indicating Lights

New level of control and precision with SprayManager app

Bypass valve

Eliminates splashback with gradual pressure release

Easy Adjust

Ergonomic handle can be rotated to suit user

TipAware

Smart technology adjusts pressure control system to suit tip selected in conjunction with SprayManager app

Less down time on the job
No tool quick removal fluid section

Reliable startup

With inlet valve pusher

Return hose diffuser

Reduces mess when relieving pressure

TECHNICAL DATA

	ProSpray PS 4.23
Part Number:	2435370
Max Tip Size	0.023"
Max Hose Length:	30m
Max. Operating Pressure:	3300 psi
Max. Flow Rate:	2.2l/min
Max Sound Pressure Level	75.1dB
Voltage	220-240V 50/60Hz
Weight	13.9 kg
Inclusions	ProSpray PS 4.23 unit, DN6 15m Hose, 517 HEA Pro tip & base, Vector Pro gun, HEA Pressure Gauge, White filter & operating manual

* The PS 4.23 is up to five times quieter and 22% lighter than previous models.
