

The Wagner logo is located in the top left corner. It features a yellow triangle above the word "WAGNER" in bold, black, sans-serif capital letters. The background of the entire advertisement is a photograph of a woman in a pink shirt and jeans, wearing safety glasses and a mask, using a yellow and black Wagner pressure washer to clean a wooden fence. The pressure washer is in the foreground, and the woman is in the middle ground. The background shows trees and a clear blue sky.

Returns Process – Overview

All warranty repairs will be completed by Wagner Authorised Service Centres.
Please contact Wagner Customer Service on 1800 924 637 (Monday-Friday, 8am-5pm AEST)

Warranty is only applicable if

1. The customer shows the original receipt of purchase.
2. The machine is in the warranty period.
3. There is no sign of damage or abuse.
Example: Is the casing smashed? Is the sprayer blocked with paint, not cleaned? Is the power cable cut, worn down or damaged?
4. Machine has been used for intended design only.
Example: Has the sprayer been used in a commercial environment for which it is not intended?

Warranty Options – Product Returns

ACTIONS	UNDER \$500 RRP	OVER \$500 RRP
Warranty Repair Applicable	Send to CRC Products under \$500 RRP, Please swap the sprayer for a new unit. Send damaged sprayer to CRC.	Contact Wagner for Authorised Service Centres Products over \$500 RRP and under warranty will be repaired. Please contact Wagner for an Authorised Service Agent. Note: After inspection, if the sprayer is deemed to not meet the warranty criteria, repair charges will be applicable.
Warranty NOT Applicable	Contact Wagner for Authorised Service Centres Wagner will provide directions and contact details for the most suitable authorised service agent. Note: Repair will be applicable to the customer.	

Important Note

CRC RETURNS

CRC returns are checked to establish if it's manufacturer fault and Warranty cover. If deemed not to be manufacturer warranty claim/fault, these products will be rejected at the inspection of CRC, which result in the cost reverting back to the store.

PRODUCTS OVER \$500

For products over \$500 should the Warranty process not be followed and a store refund given, Wagner reserves the right not to accept claims should it be deemed a non Warranty fault.

Service Centre Process

- Wagner Customer Service will advise which service centres are most suitable to the consumers location, outlining details for them to take the sprayer to the provider.
- Where this is not possible, i.e. (Local service centre not available) collection from the store can be arranged.

Packaging Requirements: follow the directions below for product pick-up.

- Place machine in a box
- Fill gaps with bubble wrap
- Be sure to include any accessories
- Complete the merchandise repair form, attach the proof of purchase and enclosed paperwork inside the box

Note: if sprayer is deemed not to meet warranty, freight charges will apply.

Warranty – Overview

What Is Covered by Warranty?

- Manufacturer faults which are demonstrably attributable to the use of faulty materials in manufacture.
- Manufacturer defects of a part or a part failure caused by an error in the assembly of the machine.
- Warranty covers the replacement of failed component only. It does not cover associated components.

What Isn't Covered by Warranty?

- The guarantee excludes commercial use, unless specified under a contractor warranty.
- The product has been modified, repaired or serviced by someone other than Wagner Australia or a Wagner Australia authorised service agent.
- Wagner cannot establish any fault in the product after testing.
- The product has been used other than for the purpose for which it was designed.
- The purchaser has used or fitted non-genuine or non-approved parts and accessories.
- The product defect has arisen due to abuse, misuse, neglect or accident.
- The product defect has arisen due to the purchaser's (users) failure to properly maintain or use the product.
- The damage has been caused by impurities in the paint supply to the product contaminating the filters or pump.
- The damage to, or failure of the product has resulted from low or high voltage, the use of an incorrectly sized extension lead or a coiled electrical extension lead.

Note: wearing parts are excluded from the guarantee and are readily available through Bunnings or Wagner Australia.

Recommended instore checks

Common trouble shooting for maintenance issues not covered by warranty for sprayers

- Air pressurising hole on the suction tube is blocked with paint, therefore container won't pressurise and draw paint to the sprayer **B**.
- Ventilation hose is not connected properly or diaphragm is installed incorrectly (upside down) or lost in cleaning **A**.
- Nozzles or seals lost in the cleaning process. (Available as spare parts).
- Filters on turbine are blocked with paint and require replacement. (This will be visible when looking at the unit).
- Unit is covered in paint, nozzles look blocked. (Visible lack of maintenance).
- Paint requires further dilution to provide best spray effect. (This will vary by model. Value based products would require more dilution).

Important functions to be checked on sprayer that affect performance

Recommended instore checks

Common trouble shooting for maintenance issues not covered by warranty for steamers

- Has the heating element on the Steamer been descaled – limescale remover?
(A build up of limescale will impact performance of the element).
- When water drops below a certain point, for safety and protection the element will switch off until water reservoir is filled.

DIY – Airless Sprayers

[#] Includes a 12 month Commercial Warranty, as part of the 3 + 1 Consumer Warranty

It is not under warranty if: The power cable is cut, worn down or damaged. The sprayer has been used in a commercial setting unless it is in line with the commercial warranty on selected products. (See notes in disclaimers above).

Control Pro must be placed to the **PRIME** position when turned off and the gun trigger pressed to release the pressure. Left in the Spray position will result in the pressure being retained to the maximum, thus the unit won't work until the pressure is released.

GUARANTEE

3+1

EXTRA YEAR

Recommended instore checks:

Common trouble shooting for maintenance or user error issues not covered by Warranty

- Has the customer turned the product off in the spray position? (Pressure is retained in the line, thus the unit won't switch on).
 - Turn off unit, switch to prime, press gun trigger to release pressure.
 - Turn to on and try in the spray position.
 - If it still doesn't work, release the pressure by disconnecting gun from handle.
- Has the inlet valve been pressed to release the ball before use? Located at the base of the hopper.
- Has the filter in the gun handle been checked to see if it has been blocked with paint? (In the back of the gun – replacement T2 filters are available).
- Is paint leaking from the T2 tip guard? If so, tighten tip guard with wrench
- Check no missing nozzles or seals that may have been lost in the cleaning process.
- Has the Spray Tip worn? (Replacement Control Pro Tips are available).

- Has the customer turned the product off in the spray position? (Pressure is retained in the line, thus the unit won't switch on).
 - Turn off unit, switch to prime, press gun trigger to release pressure.
 - Turn to on and try in the spray position.
 - If it still doesn't work, release the pressure by disconnecting gun from handle.
- Has the inlet and outlet valves been cleaned?
- Has the red pusher valve been pressed to free the inlet valve?
- Has the filter in the gun handle been checked to see if it has been blocked with paint? (In the gun handle – replacement filters are available).
- Check no missing nozzles or seals that may have been lost in the cleaning process.
- Has the Spray Tip worn? (Replacement Control Pro Tips are available).
